

# IVPAY TOKEN

IVPAY is a utility token of the ivendPay ecosystem. It was created to ensure a smooth transfer of value across our ecosystem. The token will be integrated into our services and products as payment, reward, or discount means.

## Utility token

The motivation to create it aligns with a loyalty program to stimulate the growth of the ivendPay ecosystem and its community where the IVPAY token is a means of value transfer as well as BTC, ETH, USDT etc, but instantly and at a lower cost.

## IVPAY Utility features

Stake and pay commissions in IVPAY ivendPay users will be able to get up to 50% discount on all operations in the ecosystem both for B2B and B2C solutions.

## **B2B discount system**

A 10% discount for B2B customers will be provided for token promotion

## **Loyalty rewards for affiliates of ivendPay Wallet and resellers of B2B products**

Introducers and resellers of B2B service who hold IVPAY token will be able to get up to 20% of lifetime commissions from reselled merchants

## **Deflationary Model and Token Burning**

Token burning involves removing a certain amount of tokens from circulation effectively reducing the total supply of tokens. This approach creates scarcity, which can drive up demand and increase the value of the remaining tokens.
