ivendpay

Crypto payment system for retail, e-commerce and vending machines

ivendpay

Cryptocurrency is redefining digital payments for both merchants and consumers.

It offers a wealth of untapped opportunities for merchants

Opportunities

Increased security

Lower fees

Massive consumer base

Customers are switching to cryptocurrency en masse, disrupting commerce as we know it.

ivendpay

In the last 5 years alone, cryptocurrency transactions have increased by a staggering **580%**

---

2 100 000

transactions a day

Today, the 3 largest networks process over 2.1 million transactions a day

100 Peak search interest

Google Search Trends for "Buy with Crypto"

Along with high transaction numbers, interest in spending crypto has skyrocketed

Crypto holders have massive buying power and are looking to spend at crypto-accepting merchants

JPMorgan Chase & Co.

AMD

Cryptocurrencies are here to stay and will drive the future of digital payments

Why crypto is spend-ready

Stablecoins solve volatility concerns for spenders and merchants

Rising stablecoin adoption hints that people are looking at crypto for digital payments, rather than speculation.

Stablecoins are less susceptible to price volatility as digital assets that are pegged to real-world assets like fiat money, commodities, and more.

reduction in transaction fees

Businesses accepting crypto payments are reaping the benefits

From avoiding chargebacks to reducing transaction fees and settlement times, crypto offers benefits beyond traditional digital payment processors.

The benefits of accepting crypto payments are clear. That's why more businesses globally are getting on board
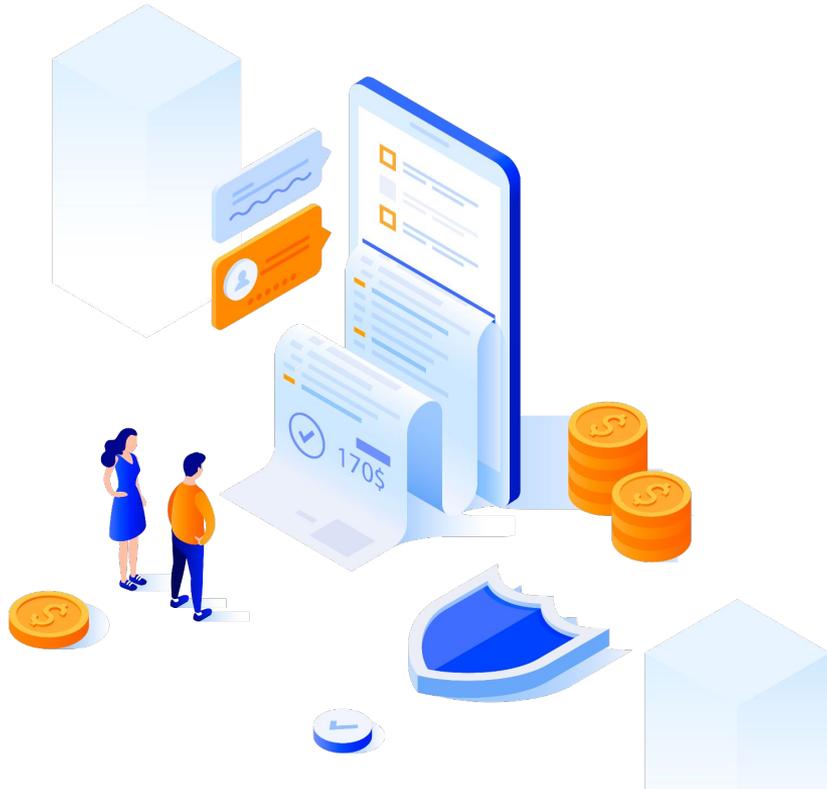

ivendPay connects merchants and users

Start accepting crypto today

ivendpay

Advantages

Any store, seller or company can install the software on their terminal and start accepting payments in crypto.

No need to buy an initial stock of crypto or create your wallets: we provide it, and you can get your revenue right from the start.
The customer scans the QR from a wallet of their choosing, enters the required amount and the money goes to the merchant within a second.

New customers? Yes, please!

Did you know 51% of crypto holders are more likely to buy from crypto merchants and 40% of crypto users are new to the merchant? When you start accepting crypto you can reach new customers locally and globally. Plus, when international customers pay with crypto, you get paid in your currency, not theirs—no worries of exchange rates or tax implications.

Fees as low as 1%

Your savings add up when your customers choose crypto over credit. Our crypto payments fees start lower than credit cards and scale as low as 1% based on payment size. Larger payments, smaller fees!

Eliminate chargebacks

Fraudulent chargebacks cost businesses billions of dollars annually. ivendPay crypto payments are final and irreversible, putting an end to chargebacks and putting more money in your pocket. Only you can reverse a completed transaction.

ivendpay

Easy. Safe. Fast.

How it works

The intuitive way to process payments

Our responsive technology streamlines payments into one integration - improving speed, reliability, conversion and data transparency.

3 Scan the QR code from any crypto wallet

4 After a successful transaction, the client receives a receipt and his goods

2 Customer selects their preferred cryptocurrency

1 Enter the purchase amount in local currency

Manage everything

Dashboard

Get a 360-degree view of your payments and business in ivendPay Dashboard

Accept Crypto Payments without Volatility for your Business

In 2014 Tether invented a digital dollar, powered by blockchain technology, the USDt token that is pegged 1:1 to the USD. Ever since investing the first Stablecoin USDt, Tether has added additional fiat stablecoins and a gold-pegged stablecoin. Tether tokens are now available at Ivendpay POS terminals.

- Increasing Listing Costs

Q4

- Merchants KPI: 10000 worldwide active merchants
- Making final decisions on global presence and optimizing collaborations with regional representatives
- White Label solution releasing

ivendpay

IVPAY TOKEN

IVPAY is a utility token of the ivendPay ecosystem. It was created to ensure a smooth transfer of value across our ecosystem. The token will be integrated into our services and products as payment, reward, or discount means.

Utility token

The motivation to create it aligns with a loyalty program to stimulate the growth of the ivendPay ecosystem and its community where the IVPAY token is a means of value transfer as with well as BTC, ETH, USDT etc, but instantly and at a lower cost.

IVPAY Utility features

Stake and pay commissions in IVPAY ivendPay users will be able to get up to 50% discount on all operations in the ecosystem both for B2B and B2C solutions.

ivendpay

B2B discount system

A 10% discount for B2B customers will be provided for token promotion

Loyalty rewards for affiliates of ivendPay Wallet and resellers of B2B products

Introducers and resellers of B2B service who hold IVPAY token will be able to get up to 20% of lifetime commissions from reselled merchants

Deflationary Model and Token Burning

Token burning involves removing a certain amount of tokens from circulation effectively reducing the total supply of tokens. This approach creates scarcity, which can drive up demand and increase the value of the remaining tokens.

B2B discount system

A 10% discount for B2B customers will be provided for token promotion
